## Mobile Connectivity for your Xerox® Multifunction Printer

Gabi Solutions has changed the way you interact with your **Xerox® AltaLink®** and **VersaLink®** Multifunction Printers (MFP) with the introduction of **Gabi Worx**. Gabi Worx will enhance your workforce's mobile connectivity to your multifunction printer (MFP) by securely and flawlessly executing MFP functionalities using **Voice AND Touch**.

Gabi Worx provides an immediate onboarding experience and eliminates the user adoption curve while providing a gold-standard biometric authentication enhancement from logging into the MFP to the release of Secure Prints using their Face or Touch ID, thus providing a **Safe, Secure, and Accessible™** environment.

With 77% of today's workforce spending at least two hours a day on their smartphones, implementing Gabi Worx will increase your work efficiency and revolutionize your workforce's MFP connectivity one command at a time.

# Why Choose Gabi Worx?

**Safe, Touchless Connectivity:** Office equipment typically host 10 to 15x more bacteria than the surrounding office environment. With Gabi Worx, your users can access from the palm of their hands what they normally have on their MFP's touch screen interface.

By providing your workforce with a safe and secure alternative to Swipe Cards, Keyboards or Touchscreen interfaces – the alternative is a familiar device, their smartphone plus Gabi Worx – your liability risk diminishes and our employee safety increases.

## Product Highlights – What's Included?

On top of remaining dedicated to your office environment's safety, Gabi Worx delivers on additional valued propositions including:

**Voice Capabilities:** With Gabi Worx, your users will be able to interact with your Xerox MFP using nothing but speech using voice-to-command capabilities eliminating the need for physical interaction with your MFP – from scanning a document to Salesforce to releasing your Secure Print.

**Multifactor Authentication:** With a gold-standard authentication, using Face or Touch ID on the Gabi Worx mobile app, your personnel can interact with your MFPs with a higher level of security as opposed to card-based user identification on your Xerox® MFP.

**Multilingual Capabilities:** Powered by IBM Watson®, Gabi Worx supports up to 13 different languages for in-app connectivity allowing you and your workforce a flawless interaction from the start with their native language on display and Spanish or English voice-to-command capabilities.

**Series Connectivity:** Allow your workforce to establish a flawless connection with your workplace fleet, exclusive to Xerox's AltaLink® and VersaLink® Series, using nothing but their smartphone device. That's right, no additional hardware required! Learn more about your series functionality on the next page...

# Series Functionality & Feature Comparison

Gabi Worx supports both Xerox AltaLink® and VersaLink® Series MFPs. Here's a brief review of what your users can access through Worx on each model within your fleet! We're always looking to enhance each Gabi product line and will be pushing updates for Worx based on the product roadmap.

# Secure by Design

Your security and privacy should always be top priority, which is why Gabi Solutions is proud to announce its safe, secure and accessible voice to command technology is backed by not one, but **four** patents issued by the USPTO focused on user-centric content and its technology flow.

## Zero Digital Footprint. No Eavesdropping. Guaranteed.

As shown in the above figure, your users will issue a whitelisted command targeted to their Xerox® MFP from their smartphone using our patented technology, which is then recycled and never stored by any Gabi device differentiating our virtual assistant against the rest.

## Regulations & Compliance

In a continuation of enforcing the protection of your data and privacy, Gabi's touchless, voice to command technology is backed by Domestic and International privacy regulations including:

General Data Protection Regulation (GDPR)

California Consumer Privacy Act (CCPA)

NYSDFS Approved

Health Insurance Portability and Accountability Act

GSA Section 508 Compliant for Accessibility

# Competitive Advantage

If you're wondering how Gabi, the preferred virtual assistant for your Xerox device compares to the rest, look no further than the competitive comparison below to understand how Worx is your go-to solution for Voice and Security

	 Alexa	 Google Assistant	 Siri	 Solutions
White Listed Commands				
Touchless, Local Platform				
Cloud Based Solution				
On-Premise Server				
User-Controlled Updates				
No Eavesdropping				
Accessible by Disabled				
Zero Digital Footprint				
Customizable/Expandable				
For Office/Remote Worker				

**DID YOU  
KNOW?**

**Available Today!**

Gabi Worx is available for Apple iOS and Android smartphone devices. Our app can be accessed from the Apple App Store or Google Play eliminating any onboarding concerns.

# "How Secure is the Competition?"

It's no secret many virtual assistants have received a bad reputation with the general public from audio recordings being stored and obtained without your knowledge, which leaves us asking: *How secure is the competition?*

Gabi leaves ZERO digital footprint with no eavesdropping, but why is that important? Here are some articles from reputable resources highlighting some risks regarding other virtual assistants on the market today emphasizing why our solution is a *game changer*.
